Secure SD-WAN Home

CYNEXLINK
YOUR BUSINESS FIRST

Don't let the kids knock your remote employees offline!

Prioritize business apps over social and gaming

Internet Access

In this new remote work environment, has your top sales rep's phone cut out during the big closing call? Has an executive team member's webinar presentation to the board crashed at precisely the wrong moment?

Now there's a simple, cost-effective solution: Home SD WAN from Cynexlink.

As you know, SD WAN simplifies data management by employing software to separate network hardware from the control layer. With our cloud-based interface, you can now control and prioritize the flow of data, including voice and video, on employees' home networks just as you can in your corporate environment!

And, by the way, you greatly enhance home network security at the same time.

Benefits

Performance for business applications on home office connection

Security for your home office network

Dedicated remote technical team for configuration and support

Monthly "as-a-service" pricing

1 Month Free Service + Free Business Softphone
Restrictions and requirements apply

CYNEXLINK
YOUR BUSINESS FIRST

Based on our Secure SD-WAN Business technology

FAQs

Hackers are penetrating remote home offices, does this protect me?   Yes, Secure SD-WAN Home comes with certified next generation firewall.

How does this work with existing Internet?   Secure SD-WAN Home works with and improves your current Internet connection.

What is in a Subscription? A subscription includes a hardware device, network and security software, support, and a Business Class soft phone with a number for Windows PC.

What if I have a higher speed internet connection? If you have a high speed Internet connection (up to 2G), we will get you an upgraded device.

Can I return this service?   Yes, we offer a 30-day money back guarantee.

How does it get installed?   A pre-configured router will be shipped to the home address with simple connection guide and collaborative turn-up call with one of our engineers.

How does support work? Our certified engineers located in the US provide technical support.
